

PROJECTS IN THE PARKS

PLANNING FOR OUR NEXT MAJOR FACILITY IMPROVEMENTS

Work has begun to plan for the completion of the rear three [3] fields, parking, second restroom-concession building and dedicated turn lane on Genito Road at River City Sportsplex.

Also, a median cross-over and left turn lane will be added on Genito Road.

Construction will take place over the next two [2] years.

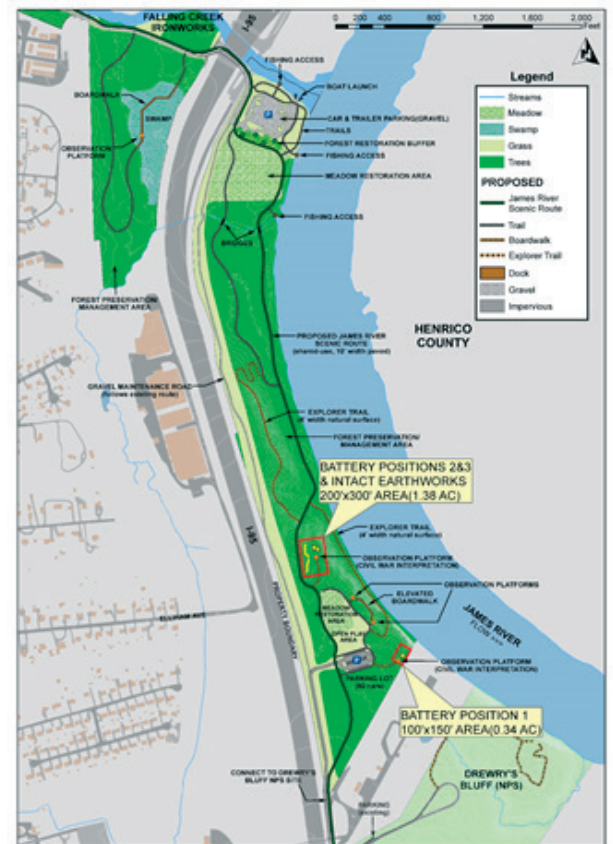

The Genito Road improvements and lighting of rear fields is planned to start first.

PLANNING FOR OUR NEXT NEW CONSERVATION AREA

Planning has begun for new facilities at the James River Conservation Area, with assistance from a National Park Service grant.

Public riverfront access will provide powered and non-powered boat launches and fishing on the northern end of the park.

Park will be connected north to south via a shared use trail, a segment of the Bikeways and Trails Plan. Picnicking and natural and historic interpretive trails will be provided adjacent the 100' bluffs on the southern end of the park.
