

# DIY WATER BOTTLE PLANTERS

## MATERIALS:

- Water/soda bottle
- Decoration supplies (paint, construction paper, googly eyes, pipe cleaners, glue, glitter, modge podge, tissue paper-really any supplies you may have on hand.)
- Soil/dirt (from your yard is fine!)
- Small plant/seeds

## DIRECTIONS:

1. Rinse out an empty water/soda bottle-size does not matter.
2. Cut the bottle so that at least 4-6 inches are left at the bottom.
3. Decorate the cut bottle in anyway you would like with supplies you have available-paint, glue, glitter, stickers, cardboard, etc.
4. Once your decorations dry, fill the bottom 3/4 full with dirt or soil.
5. You can plant existing small plants or seeds.
6. Place in a sunny, warm space. Water as needed.
